

THE VALUE OF PERFORMANCE.

NORTHROP GRUMMAN

CGA™ **Product Specification** **Rack Unit**

High capacity rack mounted appliance

www.GeospatialAppliance.com

The CJMTK Geospatial Appliance (CGA) from Northrop Grumman provides effective, user-friendly access to worldwide coverage of NGA geospatial products. The appliance can be preloaded with RPF, VPF and DTED in application-ready formats to support your mission.

The CGA optimizes access to geospatial data through a set of innovative tools that are transparent to the user. Data management and system administration are built into a service plan that includes updates of National Geospatial-Intelligence Agency (NGA) data and CGA software.

Your CGA for the enterprise

Additionally, the CGA hardware is refreshed after receiving your third year of purchased support. The CGA is easy to install, operate, and maintain, whether in the office or deployed in the field.

CGA is compliant as to Section 508 of the Rehabilitation Act as it pertains to Software Applications and Operation Systems (§ 1194.21), except for requirement (i) of this section.

CGA™ Rack Unit
Model: CGAR12

Specifications:
 Height: 5.2"
 Width: 17.2"
 Depth: 25.5"

- Redundant 1200W AC Power Supply
- Dual Xeon Quad Core E5620 2.4 5.86GT/s
- 48GB [12x4GB] DDR3 ECC REG
- DVDRW
- 3Ware 9750 Raid Controller W/BBU
- 16x 2TB SATA2 6GB/s 7200RPM (RAID 5)
- PNY Quadro 2000 PCIE Video Card 1GB
- Intel 2 Port GbE Fiber 82576 MMF-SR (Add-on Card)
- Optical Pex-1394B FireWire PCIE Card
- Rack Mount Rails
